

Texas Commission on Environmental Quality
Customer Service Inspection Certificate

Name of PWS:	CASH SPECIAL UTILITY DISTRICT		
PWS ID #:	1160018		
Location of Service:	Customer:	Account#	

Reason for Inspection:	
New construction	<input type="checkbox"/>
Existing service where contaminant hazards are suspected	<input type="checkbox"/>
Material improvement. Correction or expansion of distribution facilities	<input type="checkbox"/>

I _____ upon inspection of the private water distribution facilities connected to the aforementioned public water supply do hereby certify that, to the best of my knowledge

Compliance	Non-Compliance		
<input type="checkbox"/>	<input type="checkbox"/>	(1)	No direct or indirect connection between the public drinking water supply and a potential source of contamination exists. Potential sources of contamination are isolated from the public water system by an air gap or an appropriate backflow prevention assembly in accordance with Commission regulations.
<input type="checkbox"/>	<input type="checkbox"/>	(2)	No cross-connection between the public drinking water supply and a private water system exists. Where an actual air gap is not maintained between the public water supply and a private water supply, an approved reduced pressure principle backflow prevention assembly is properly installed.
<input type="checkbox"/>	<input type="checkbox"/>	(3)	No connection exists which would allow the return of water used for condensing, cooling or industrial processes back to the public water supply.
<input type="checkbox"/>	<input type="checkbox"/>	(4)	No pipe or pipe fitting which contains more than 8.0% lead exists in private water distribution facilities installed on or after July 1, 1988 and prior to January 4, 2014.
<input type="checkbox"/>	<input type="checkbox"/>	(5)	Plumbing installed on or after January 4, 2014 bears the expected labeling indicating $\leq 0.25\%$ lead content. If not properly labeled, please provide written comment.
<input type="checkbox"/>	<input type="checkbox"/>	(6)	No solder or flux which contains more than 0.2% lead exists in private water distribution facilities installed on or after July 1, 1988.

I further certify that the following materials were used in the installation of the private water distribution facilities:

Service lines:	Lead <input type="checkbox"/>	Copper <input type="checkbox"/>	PVC <input type="checkbox"/>	Other <input type="checkbox"/>
Solder:	Lead <input type="checkbox"/>	Lead Free <input type="checkbox"/>	Solvent Weld <input type="checkbox"/>	Other <input type="checkbox"/>

NOTICE TO CUSTOMERS

Cash Special Utility District hereby notifies all customers that all water utilities in the State of Texas must comply with the rules and regulations of the Texas Commission on Environmental Quality (TCEQ) concerning construction, renovation, or modifications of private plumbing facilities.

Pursuant with Chapter 290 of the Texas Water Code, effective January 1, 1996, a Customer Service Inspection Certification shall be completed prior to providing continuous water service to a new construction, on any existing service when the water purveyor has reason to believe that cross-connection or other unacceptable plumbing exist or after any material improvement, correction, or addition to the private plumbing facilities.

Individuals with the following credentials shall be recognized as capable of conducting a customer service inspection certification:

- Plumbing Inspectors and Water Supply Protection Specialists licensed by the Texas State Board of Plumbing Examiners.
- Certified Waterworks Operators and members of other water related professional groups who have completed a training course, passed an examination administered by the commission or its designated agent, and hold an endorsement granted by the commission or its designated agent.

Customer Service Inspections shall certify the following:

- No direct connection between the public drinking water supply and a potential source of contamination exists.
- Potential sources of contamination are isolated from the public water system by an air gap or an appropriate back flow prevention assembly in accordance with state plumbing regulations. Additionally, all pressure relief valves and thermal expansion devices are in compliance with state plumbing codes.
- No cross-connection between the public drinking water supply and a private water system exists. Where an actual air gap is not maintained between the public water supply and a private water supply, an approved reduced pressure-zone backflow prevention assembly is properly installed and a service agreement exists for annual inspection and testing by a certified backflow prevention device tester.
- No connection exists which would allow the return of water used for condensing, cooling, or industrial processes back to the public water supply.
- No pipe or pipe fitting which contains more than 8.0% lead exists in private plumbing facilities installed on or after July 1, 1998, and prior to January 4, 2014. No pipe or pipe fitting which contains more than 0.25% lead exists in private plumbing facilities installed on or after January 4, 2014
- No solder or flux which contains more than 0.2% lead exists in private plumbing facilities installed on or after July 1, 1998.
- No plumbing fixture is installed which is not in compliance with a state approved plumbing code.

The copy of the attached Customer Service Inspection Form must be properly completed and returned to the Cash Special Utility District office located at 172 FM 1564 East, Greenville TX 75402. The customer's water service cannot be considered a permanent service until the form has been returned to our office and made a permanent part of the customer's file. Each customer is legally responsible for the validity of the information provided.
